

LabConnect

Your IoT Cloud Platform
solution for data driven lab
decisions.

Monitor. Gain insights.
Take action.

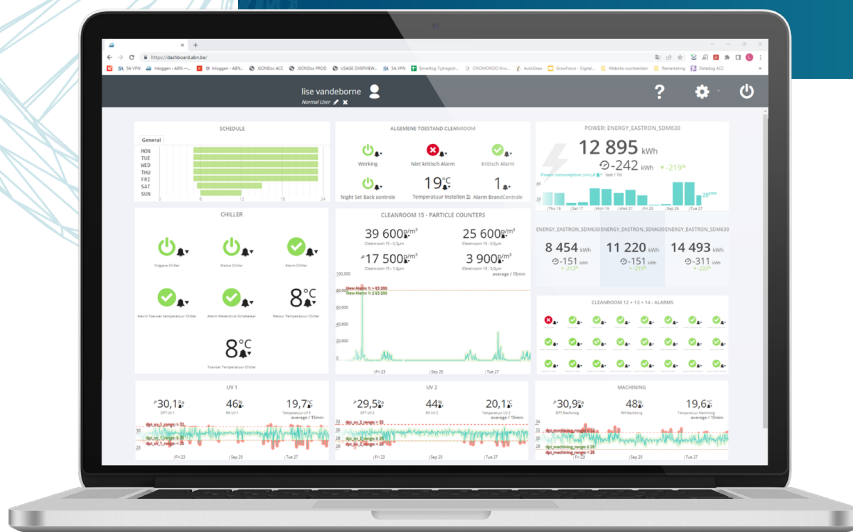

ABNLABS

Reliable monitoring for multiple applications

LabConnect monitors laboratory environments in pharmaceutical and biotechnology applications, manufacturing areas, storage, distribution and research & development.

Our IoT platform provides:

- A web-based cloud platform with user friendly software.
- Preconfigured and standardized visualization tools for easy laboratory data integration.
- Unlimited and real-time monitoring of laboratory parameters with reporting functionalities in Excel or pdf.
- Alarm management module with customizable alarm settings.
- Alarm notifications by email, sms, voice.
- Monitoring data can be shared with other systems via API.

ABNLABS

LabConnect features

Affiliated to ABN Labs is our IoT cloud platform LabConnect, which is developed for HVAC asset monitoring and analyzing laboratory applications. By connecting sensors on our cloud-based platform, LabConnect helps ABN Labs transform and connect unconnected business infrastructures. This enables us to continuously collect laboratory data regarding the efficiency, performance and usage of your laboratory. The measurements can range from temperature, humidity and pressure, all the way to fume hoods or other critical asset monitoring.
